

Reverse 911

Public Alert and Notification

Reverse 911 provides emergency officials the ability to send a recorded emergency message to San Luis Obispo County residents and businesses. It can be utilized for emergencies where public health and safety is a concern such as evacuation orders, missing person notifications, and much more.

To increase the effectiveness of the system, residents are encouraged to register their wireless devices, VoIP phones, and any other provider that is not AT&T or Verizon as only conventional phone lines are automatically entered into the system.

To learn more, or to register your wireless device **visit:**
